**HERS®
SCORE
74**

The **Home Energy Rating System (HERS) Index** is a nationally recognized system for assessing a home's energy performance (resnet.us). A new home built to the 2006 IECC scores a 100. One point in either direction indicates the home is either 1% more or less efficient than the 2006 IECC reference design home. A lower score indicates a more energy efficient home, resulting in lower energy bills.

*This sticker is intended for comparison purposes only. Actual energy savings and energy use is dependent upon occupant(s). Estimates are based on modeling from Architectural Energy Corporation's REM/Rate software. © 2012 Southern Energy Management
